

Town of Kernersville Engineering Department Engineering Services

Driveway Permits

All new and modified driveways accessing Town and NC DOT streets and road rights-of-way are required to obtain driveway permits prior to installation. Any change of use on a property also requires approval of a driveway permit. With the exception of single family residential driveways onto NC DOT rights-of-way, both Town and NC DOT driveway permits are required for NC DOT rights-of-way within the Town's planning jurisdiction.
